NEW

COMPACTline

The new size in the IBC market
now with plastic pallet

EQUIPMENT

- W 800 mm x L 600 mm x H 1000 mm
- 300 l nominal volume
- Internal container made from HD-PE blow-grade granules
- Meets the requirements of FDA/EN 10/2011
- Galvanised, easy to clean steel tubular frame
- Durable, easy to clean plastic pallet
- Filling opening with lid 150 mm nominal width
- Sliding valve 50 mm nominal width
- Label panel
- UN approved UN 31HA1/Y/D/BAM
- Fill level scale
- Returns via PACKONE system
- Drainage elbow

Optional with:

- Pressure compensation system
- Threaded connection S 56x4 with sealing plugs and seal cap
- CDS removal system

ECONOMICAL

- Saves space during transport, storage and production.
- Easy to handle with forklifts when loading and unloading, which optimises process costs (no special equipment required).
- Large dome opening allows a quick filling process – reduces foaming.
- End customers with low quantity requirements (< 600 l) benefit from IBC handling.

SUSTAINABLE

- Almost 100 percent complete emptying, which saves material and reduces waste.
- Return to manufacturer for disposal via the PACKONE system.
- Recycling in a manner which saves resources.

SAFE

- Stable pallet with attached steel frames, ensures safety when handling.
- The compact, stackable structure permits you to store in an interlocking manner. This saves time and material when securing the load.
- Residual content can be identified directly thanks to transparent PE blister and fill level scale.
- Tested and suitable for filling with hazardous goods and foodstuffs.
